GLASS PARTITIONS

## SOCIAL DISTANCING INSPIRATION

How glass partitions can help you get back to work safely

# THE NEW NORMAL

The coronavirus pandemic has changed the ways we will all need to live and work for the foreseeable future. A degree of social distancing is likely to be a reality in all our lives for some time yet.

At the same time, we all need to find ways to try and get back to something like a new normal. Returning to work is a key part of that. It's important for our finances, for our mental health, and for the economy.

But it's vital that any return to work is safe. Your staff/visitors/students/customers need to feel reassured that you have taken appropriate measures to protect them by enabling them to maintain social distancing guidelines whilst on your premises.

# FRESH THINKING AROUND GLASS PARTITIONS

Glass partitions have quickly revealed themselves to be an effective social distancing solution. They can help reduce social contact and the transmission of the virus resulting in a safe but friendly environment.

From full height partitioning and self-contained pods to desk screens and dividers, glass partitions provide a flexible, quick to install, long-term solution which can be completely customised for your workplace.

# WHY CHOOSE GLASS PARTITIONS?

- Available with antimicrobial finishes
- Easy to clean
- Maximises natural light
- Quick and easy to install
- Cost effective and flexible
- Standard modular sizes and made to measure options.

**We wanted to share some ideas to help inspire you to take the right action for your staff and your business.**

# INTRODUCING THE KOMFORT PROTEKT SOCIAL DISTANCING RANGE

It's clear to see why Komfort are our chosen supplier. They have really thought about the current challenges and come up with a new range, a twist on their core offering, that's perfect for supporting a return to "normal".

## IDEAS FOR SCHOOLS, COLLEGES AND UNIVERSITIES

Getting children back into education is a critical step in helping the country get back to some semblance of normal, but the challenges are significant. Glass desk screens can provide some reassurance to students, teachers and parents by helping to reduce the spread of germs.

Glass partitions with doorless openings mean teachers can still communicate with the whole class whilst splitting children into smaller teams. They can also help divide communal areas into more workable spaces.

## IDEAS FOR OFFICES

Full height partitioning can be used to help divide up large open plan and communal spaces, allowing teams to be split into smaller, safer groups. They can provide a physical barrier between people seated around a large table without inhibiting communication.

Desk screens make it safer for people to sit opposite and next to each other without making them feel isolated. Different heights, depths and configurations are available and can be completely customised to your workplace. We can even add branded manifestations to the glass to make them entirely personal.

## IDEAS FOR RECEPTIONS AND WAITING ROOMS

Visitors and staff can be kept safer even where there's not enough space to spread people further apart. Partitions between chairs and to divide up waiting areas help provide a barrier without compromising the natural light or making the space feel unwelcoming.

## IDEAS FOR RESTAURANTS, COFFEE SHOPS, PUBS AND BARS

Customers can still enjoy a drink or meal whilst maintaining social distancing. Glass partitions and booth dividers help separate groups of diners. It's easy for staff to wipe down in between sittings too.

## IDEAS FOR HAIRDRESSERS

Whilst close contact between customers and staff is unavoidable in a hairdressers, keeping clients at a safe distance from each other has become very important. Glass dividers between wash basins and chairs will mean you can reassure customers that you have their best interests at heart.

## GLASS PODS

We've been installing glass pods for a number of years thanks to an increased demand for more private working spaces within open plan environments. They're good for meetings, for concentrated working, and now for assisting with social distancing. Easy to install, they are an excellent way to make your existing space more workable.

## MOVEABLE SCREENS

If you need a greater degree of flexibility, moveable glass screens on castors with lockable wheels could be a good option. Great for workshops where your team may need to move around, or in care homes to help with safer visits, they can also help direct foot traffic around larger shops and leisure facilities.

# HOW WE CAN HELP

As experts in glass partitions, we're perfectly placed to help you.

We can come and assess your workplace (following all social distancing guidelines, of course) and discuss your options. We can then provide a full quote based on an existing modular solution, or something completely bespoke if needed.

We will then take care of the complete supply and installation giving you peace of mind that you are all set up and ready to welcome staff and visitors.
